

## Where our food waste comes from:

**43%**  
Consumers

**40%**  
Restaurants,  
grocery stores,  
food service  
companies

**16%**  
Farms

**2%**  
Manufacturers

# Food waste & Water

Throwing away **one burger** wastes the same amount of water as a **90-minute** shower.

The water used to produce the food wasted could be used by **9 billion** people at around **52 gallons** per person per day.

Food waste is **70%** **water**, which is what makes it so heavy.
