

Pollution Prevention Institute
Statement of Environmental Commitment
2024

The Pollution Prevention Institute's mission is to protect public health and promote sustainability through environmental education and services to industry, institutions, and communities. As such, environmental protection is the very foundation of our mission and activities. Our statement of environmental commitment and day-to-day operations reflect the fact we are professionals in the field of environmental management, dedicated to the principles of pollution prevention. The following statements stem from a conviction that we can maintain credibility only if we lead by example.

- As we encourage environmental statutory and regulatory compliance from the regulated community, we must ensure we, too, meet or exceed all applicable legal and other environmental requirements.
- We will demonstrate continual improvement in our own environmental performance as an example of our expectation of environmental improvement from those we serve. This includes reviewing this statement annually.
- Continual improvement requires a commitment to evaluate pollution prevention and source-reduction approaches within our office as well as in our external operations.
- As we encourage our clients to inform the public and regulatory community of their environmental performance, we will also take positive steps to consult and inform the public concerning our environmental commitment and performance.

PPI environmental specialists pledge to seek other opportunities for environmental and organizational improvement. Through our actions, we pledge to provide effective leadership to meet these challenges.
