VAPES AREN'T DISPOSABLE.

They are a major source of trash and recycling fires.

Vape devices can be damaged after disposal, **causing their batteries to ignite** and catch surrounding material on fire.

Even "dead" batteries can cause harm.

DON'T THROW VAPES IN THE TRASH.

Take them to a household hazardous waste facility instead.

Scan the QR Code to find your local household hazardous waste facility and learn more about proper vape and battery disposal.
